Daniel Thengvall

I am a developer/hacker/maker living in San Francisco. Previously I worked @rixty, building stunning web apps for @microsoft, @coinstar and @skrill. Along with creating for web, I also have experience developing iOS and Android apps.

Your company
2014
I am looking for a company with passion for their product
and an ambitious vision for the future.

Rixty, Inc.
2011
As Lead Developer, I handled things like api integration's, product localization, and internal CRM tools. I played a key role in the design and development of new products and features, including integrations with companies like Coinstar, Skrill and Microsoft.

In 2012 Rixty was purchased by MOL, a Malaysian online payments company, this allowed for rapid international expansion in latin america and south east asia. Building on an open-source java stack running in EC2, I worked to improve the efficiency and performance with new tools like elasticsearch as well as other enhancements to the platform.

Art Institute
2008
Advertising major

Started programing
2004
Bought a book on ActionScript 2.0
