Daniel Thengvall

I am a software engineer living in San Francisco, for the past decade I have been writing financial systems in Java, previously worked for Wyre, SnapCard and Rixty.

Your Company

2019 – Present

I'm looking for a company in the financial technology/payments sector with passion for their product and an ambitious vision for the future.

Wyre, Inc.

2016 – 2019

Wyre is the leading infrastructure provider in crypto. After trading over $3.5 billion in cryptocurrency assets and completing over $750 million in bank-to-bank FX payments, Wyre has established a network of relationships with leading banks and exchanges. As a **Senior Software Engineer** I worked to develop the user-facing applications along with administrative tools for the compliance, customer support and accounting teams.

> *In October of 2016, SnapCard, Inc. rebranded to Wyre, Inc.*

SnapCard, Inc.

2014 – 2016

SnapCard is a bitcoin payments company, focusing on providing tools for easy management and transfers at the best rate. As a **Senior Software Engineer** I worked to add new currencies through integrations with third party exchanges. Being part of a growing company I wore many hats, from training new engineers to building mobile and web applications.

Rixty, Inc.

2011 – 2014

Rixty is an alternative payment system focusing on consumers without credit cards. As **Lead Developer** I managed api integrations with companies like Microsoft, Coinstar and Skrill. I also worke to localize the platform for new countries like Brazil and built tools for the customer support team.
